

HORIZON

NEW ZEALAND

Beautifully Crafted.

50 *Years*

With 50 years experience, Kemlan has developed a proven and strong distribution network to service our product and customers. We highly recommend customers purchase from these authorised dealers who provide rigorous and complete customer service. Purchase of a product online is strongly not recommended, as service, safety and customer satisfaction cannot be guaranteed.

Founded from humble beginnings in 1969, Kemlan Industries is today one of the world's leading specialist fireplace design and manufacturing companies. Proud to have remained family owned. Every Kemlan fireplace is crafted to exacting standards of quality, reliability, and innovative design supported by outstanding service.

CELESTIAL FREESTANDER

URBAN AND RURAL

FEATURES

- Low 1.5 g/kg particulate
- Up to 10 hours burn time
- Folded 6mm steel firebox, firebrick lined with n14 ceramic baffle creating a robust and durable fire box
- The large clean ceramic glass-viewing area features a preheated primary airwash system which ensures a clean view of the fire
- 68% efficiency
- 10 year warranty
- 3mm mild steel secondary air tubes that will give a long life through many years of hot burns
- Premium ceramic baffles that will never bow or wear-out from excessive heat

COUPE SERIES

RURAL - OVER 2 HECTARES ONLY

FREESTANDING, IN-BUILT OR WALL PENETRATION

The Kemlan Coupe Series is a double-sided unit that comes in freestanding, in-built or wall penetration models. The Kemlan Coupe burns safely, with the flame behind two large, strong ceramic glass viewing areas on either side. The advanced airwash system keeps the ceramic glass clean throughout the life of the fire and the full shielded firebox incorporates a two-way natural convection system. The Kemlan Coupe system beautifully distributes warmth evenly between two rooms and an optional two-speed fan is available to increase circulation with fan forced convection.

Coupe Inbuilt

COUPE WALL PENETRATION & INBUILT FEATURES

- Firebrick-lined floor with baffle plate and 6mm steel back plate for a robust and durable firebox
- Unique double-sided fire
- Can be loaded from either side
- Pre- heated air-wash system ensures a clean view from both sides
- Suites single or double brick install
- 2 speed fan standard
- Satin Black standard
- 6mm laser cut mild steel firebox
- Unique Pyro- ceramic baffle
- 10 year warranty
- 3mm mild steel secondary air tubes that will give a long life through many years of hot burns
- Premium ceramic baffles that will never bow or wear-out from excessive heat

SUPER NOVA F/S	360	115	325	895	793	125
CUBE	300	90	300	875	1004	125

One 900mm length of heatshield must be fitted to the flue to achieve clearances to heat sensitive materials (measurements A B C D E F). For all freestanding models a floor protector is required where the floor is heat sensitive. Thickness to be a minimum of 9mm heat resistant material. With regard to the Coupe Insert and Wall Penetration units; they both require 9mm of non combustible sheet below the unit. All dimensions shown are approximate. Check all dimensions accurately before installation. Before installation refer to the installation instructions. In line with our policy of continuous improvement, we reserve the right to alter specifications without notice.
